1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Fasse on 5/4/05.

The application has been amended as follows:

In claims 7 and 8, please replace the R on the left hand side of the formula with an H.

In claims 7 and 8, please delete the entire phrase "each R, R', and R", independently... or amino;" (directly after "wherein").

In the specification, page 5, prior to "DESCRIPTION OF DRAWINGS" please insert the word "BRIEF".

2. The following is an examiner's statement of reasons for allowance: Applicants' amendment has overcome the various rejections under 35 USC 112 noted in the prior office action. The claims are now definite and are supported by the specification. The Examiner has withdrawn the election of species requirement. Upon further review of the prior art the Examiner cannot find any reference which teaches or suggests the instantly claimed polyorganosilicone. Particularly the fact that the siloxane contains a repeating unit wherein a siloxane chain is bonded via a C-O-C-A link to a C(=O)BC(=O) group, and having a terminal C-O-C bonded OH or NH₂ on one end while having a C(=O)BC(=O)- (OH or alkoxy) group on the other end is key to this specific polymer. Such a formula is neither taught nor suggested by the prior art. For claim 12, the Examiner notes that it would be well within the skill of the ordinary artisan to select the specific reactants necessary to arrive at the claimed siloxane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
